Software Engineer at **Samsung R&D Bangladesh** experienced in **C#, .NET, WPF, WCF, and MVVM** for production ultrasound systems. Strong in **Data Structures, Algorithms, and Competitive Programming**, with research experience in **Machine Learning** and knowledge of **LLMs, RAG, and Agentic AI**.

EXPERIENCE

Samsung Research & Development, Bangladesh **Feb 2025 – Present**
Software Engineer

- Develop and maintain production software for Samsung's **full-touch ultrasound systems** using **C#, .NET, WPF, WCF, and MVVM**.
- Design and implement production **UI views and ViewModels**, translating UX specifications and product requirements into functional and maintainable components.
- Enhance and modernize **legacy ultrasound software**, implementing new UI functionality within an established production architecture.
- Investigate and resolve **SQA issues across multiple software components**, including issues outside directly assigned modules, through debugging and root-cause analysis.
- Collaborate with **Samsung Seoul UX and engineering teams** on integration, debugging, and product refinement.
- Completed a **3-month onsite assignment in Seoul, South Korea**, working directly with Samsung engineers and UX teams on development and integration activities.

Shohoj Coding **Dec 2025 – Present**
Competitive Programming Mentor

- Mentor students in **DS, Algo, and CP**, covering algorithmic problem solving, implementation, and contest techniques.

Scale AI / RemoTasks **Jun 2023 – Aug 2023**
AI Trainer

- Solved algorithmic programming problems and prepared **solutions, explanations, and test cases** for AI training datasets.

COMPETITIVE PROGRAMMING

- Solved **4000+ problems** across online judges; **Codeforces Expert** with a maximum rating of 1847 and **5* CodeChef**.
- **ACM ICPC Asia West Participant 2025**. Asia Dhaka Regional Contest: **21st in 2024**, 38th in 2023, and 25th in 2022 and 2021.
- **NCPC 2023: 15th Final / 14th Preliminary** among 1300+ teams.
- **7th** in BUET CSE Fest IUPC 2023 and **18th** in KUET CSE Fest IUPC 2025.
- **3rd place** in the SRBD Code Contest 2024 onsite contest; finalist in 2023 and 2024.

RESEARCH & PUBLICATION

From Code to Career: Assessing Competitive Programmers for Industry Placement
IEEE Conference Paper (QPAIN) IEEE Xplore Document ID: **11171661**

- Developed a **machine learning model** to predict industry placement using Codeforces performance, rating progression, and problem-solving behavior.

EDUCATION

Jahangirnagar University **2020 – 2025**
B.Sc. in Information & Communication Technology *CGPA: 3.57 / 4.00*

Institute of Information Technology

TECHNICAL SKILLS

Languages	C++, C#, C, Python, Kotlin
Frameworks / Technologies	.NET, WPF, WCF, MVVM, Git
Software Engineering	Object-Oriented Programming, UI Development, Debugging, SQA Issue Resolution, Legacy Code Enhancement
Computer Science	Data Structures, Algorithms, Competitive Programming, Algorithmic Problem Solving
Additional	Machine Learning, Supervised Learning, Classification, Feature Engineering, EDA, Model Evaluation, Scikit-learn, AI/LLM Fundamentals, Prompt Engineering, RAG, AI Agents, Agentic AI
